- Gas
- Nuclear
- Hydroelectric
- Biofuels and waste
- Geothermal, solar, wind
- Coal

Energy sources in 2012

- Reduce the production of waste and reuse.
- Recycle as much as possible: cans, paper, glass and plastic.
- Save electricity: use only what you need.
- Save petrol: walk, ride your bike, take a bus.
- Keep doors and windows closed to avoid heat loss, use only the amount of hot water you need.
- Saving energy helps protecting the environment.
